REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The independent claims 1, 11, and 21 recite the limitations, taking claim 1 as exemplary, "...determining if the syllable in the first one of the storage locations in the first buffer has been transferred from the first buffer to the instruction pipeline; and in response to a determination that the syllable in the first one of the storage locations has been transferred, causing the corresponding syllable stored in the corresponding one of the storage locations in the second buffer to be transferred to the first one of the storage locations in the first buffer...". Claims 11 and 21 contains similar limitations. The prior art searched has taught transferring data between two buffers, e.g. from an instruction cache to an instruction buffer, but not under the specific conditions in the claims. The prior art searched did not teach that an instruction syllable in a specific location in the second buffer be transferred to the first location in the first buffer when the first buffer location is vacated. More specifically, the prior art has not taught that the second buffer has specific corresponding storage locations associated with specific storage locations in the first buffer and to transfer data from the two associated locations in the two different buffers after determining that an instruction syllable in the first buffer has been issued.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
